SENIOR FULL-STACK SOFTWARE ENGINEER

Results-driven Senior Software Engineer with 7 years of experience building scalable FinTech applications. Expert in Python/Django, React.js, PostgreSQL, and AWS cloud infrastructure. Led development of payment processing systems handling £200M+ annually. Passionate about clean code, mentoring, and continuous improvement.

TECHNICAL SKILLS

- Languages: Python (Expert), JavaScript/TypeScript (Expert), SQL (Advanced), HTML/CSS (Advanced)
- Backend: Django, Flask, Node.js, Express, NestJS, REST API, GraphQL
- Frontend: React.js, Vue.js, Redux, Webpack, Vite, Material-UI
- Databases: PostgreSQL, Redis, MongoDB, Elasticsearch
- Message Queues: RabbitMQ, Apache Kafka
- Cloud: AWS (EC2, S3, Lambda, RDS, CloudWatch), Azure (basic)
- DevOps: Docker, Kubernetes, GitHub Actions, Jenkins, Terraform
- Testing: Pytest, Jest, Cypress, Selenium, TDD
- Other: Microservices, Event-Driven Architecture, PCI DSS compliance, ISO 20022

PROFESSIONAL EXPERIENCE

Senior Software Engineer | PayFlow Technologies, London | January 2021 — Present

- Architected and built real-time payment settlement system using Python/Django, React, and PostgreSQL
- Reduced transaction processing latency by 60% through Redis caching and query optimization
- Led team of 4 engineers in agile sprints, conducting code reviews and technical design sessions
- Implemented PCI DSS compliant payment processing pipeline handling 50,000+ daily transactions
- Mentored 3 junior engineers through pair programming; two promoted to mid-level within 18 months
- Built event-driven microservices using Kafka for transaction audit logging
- Technologies: Python, Django, React, PostgreSQL, Redis, Kafka, AWS, Docker, Kubernetes

Software Engineer | FinCore Banking Solutions, London | June 2018 — December 2020

- Developed customer-facing banking portal serving 500K+ users using Node.js and Vue.js
- Implemented SEPA payment integration, reducing cross-border transfer time from 2 days to real-time
- Built automated CI/CD pipeline with GitHub Actions, reducing deployment time from 4 hours to 30 minutes
- Created comprehensive test suite achieving 85% code coverage with Pytest and Jest
- Technologies: Node.js, Express, Vue.js, PostgreSQL, RabbitMQ, AWS Lambda, Docker

Junior Developer | StartUp Finance Ltd, Manchester | September 2016 — May 2018

- Built RESTful APIs for mobile banking application using Python/Flask
- Implemented user authentication and authorization with JWT tokens
- Contributed to open-source Flask extensions (2,000+ GitHub stars combined)
- Technologies: Python, Flask, JavaScript, PostgreSQL, Redis

EDUCATION

MSc Computer Science (Distinction) | Imperial College London | 2015 — 2016

- Specialisation: Distributed Systems and Financial Computing
- Thesis: "Scalable Payment Processing Using Event-Driven Microservices"

BSc Computer Science (First Class Honours) | University of Manchester | 2012 — 2015

- Relevant Modules: Algorithms, Database Systems, Software Engineering, Machine Learning

CERTIFICATIONS

- AWS Certified Solutions Architect — Associate (2022)
- Certified Kubernetes Administrator (CKA) (2021)
- PCI DSS Implementer Certification (2020)

PROJECTS & OPEN SOURCE

- **py-payment-gateway** — Open-source Python library for payment gateway integrations (3,500 GitHub stars)
- **fintech-dashboard** — Real-time financial analytics dashboard built with React and D3.js
- Regular contributor to Django REST Framework and Celery projects

COMMUNICATION

Published 5 technical articles on company engineering blog (avg. 10K views). Presented at London FinTech Developer Conference 2023 on "Building Resilient Payment Systems." Known for clear technical documentation and effective cross-team communication.
